CS4HS 2015 July 15-17th 830-530PM

Join UW CSE for a 3 day workshop and earn 20 clock hours.

The workshop is targeted at middle and high school teachers of science and math with no computer science or programming experience.

CS4HS 2015: July 15th-17th

Would you like the resources to incorporate modern, fun, and accessible computer science elements into your math or science class? Join us for our CS4HS workshop at the University of Washington, where we will introduce you to basic computer science ideas and give you the knowledge and resources to integrate these ideas into your teaching of the natural sciences and mathematics.

Specifically, the CS4HS workshop aims to:

- Earn 20 clock hours from WSTA
- Expose you to exciting examples of computer science operating in close relationships with other disciplines.
- Teach you the basics of computational problem solving and give you the vocabulary to relate these concepts to your students and your own subject material.
- Broaden your view of computer science and the way it is shaping Washington's communities and people--and those of the entire world.
- Explore opportunities for you to help broaden your students' interest in computer science and dispel myths about what computer science is and is not.

Please see our registration page at cs4hs.cs.washington.edu

Cost: $50 (includes clock hours and lunch)

You don’t have to take our word for it:

"This is the most fun I've had in a professional development, EVER!

"I was super impressed with the calibre of speakers and information given. This was a 'class act' in every way. Even the food was impressive! I will be able to use the information given to me to benefit my students."
